DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the In re claim 89-91, the "abutment means"; claim 93, the "first & second aperture, a snap button"; claim 94, the "telescoping tubes", claim 110, the "securing means" as claimed does not correspond to the specie of fig 13A, 13BL, 13BR, and not shown and/or disclosed must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. Claims reciting elements not shown will not be treated on the merit.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will

be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 88-94, 110 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 4. Newly added phrase in claim 88, the "or equivalent" is indefinite; the meets and bounds of the claim cannot be determined.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 111, 113, 115, 117 are rejected under 35 U.S.C. 102(b) as being anticipated by Callis (4477114).

In re claims 115, 117, these claims are not generic, but set forth a different specie, by original presentation & election of specie representing claim 88, these claims are not treated on their merit.

It is noted that claim 112 & 114 are substantially equivalent & represent the specie set forth in claim 88 & 92 respectively.

In order to provide a prespective of the generic nature of claim 111, Callis is applied against the limitations of the claim:

as shown in fig 1 & 3, a raking & picking position is shown, where in the picking position the first transverse branch (ref 2) of the first and second rake handles (ref 1) are shown to be substantially facing each other; connecting means or strap (ref 3; but other "connecting means" also provided as shown in fig 1) for joining the rake heads together.

Art Unit: 3671

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 88-91, 93-94, 110, 111-113, 115, 117 are rejected under 35 U.S.C. 102(e) as being anticipated by Mitchell (6370857).

Claim 88 & 112, both reciting the gripping connection comprising a resilient member on a handle portion for holding the other handle portion in raking mode (see at ref 87, the left side in fig 3 & right side in fig 2), the first substantially transverse branch (see fig 3, ref 107, is substantially transverse).

Allowable Subject Matter

8. Claim 114 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. Claim 92 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Amendment

10. Applicant's arguments filed 9/15/2004 have been fully considered but they are not persuasive.

In re Applicant's argument & finding that non-elect, withdrawn from examination, claim 81, and elected claim 88, representing the same specie, is incorrect; because, claim 88, represents 13A & 13BL & 13BR, i.e. "gripping connection ... resilient member ... has an opening ... receiving the outer dimensions of ... the rake handles." This recitation is clearly pointing to element ref 136, of fig 13BL, since, for example, spring clip, ref 104, fig 6CL, does not receive the outer dimensions of the rake handle. As shown in fig 6CL, a bevel portion, which is less than the outer dimension of the rake handle, is shown to server as the area to be coupled by the spring clip.

On the other hand, claim 81, calls for "connecting means ... comprising a pivotal connection for flexibly and pivotally connecting the upper end of one of the first and second rake handles to a section of the other ... handles proximal the upper end."

Therefore, it refers to the rake which is unlike the specie described in claim 88.

Conclusion

11. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

12. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
